# VOICE RECORDING

## **'Down The Line' Voice Records via ISDN & Source Connect**

Our two studios are both equipped with ISDN & Source Connect Pro, allowing us to connect digitally & in sync with pictures to similarly equipped studios, broadcasters, advertising agencies, and voice-over artists all over the world.

## **Voice Over in Sync with Picture**

Voice to picture sessions are made easy with our experienced engineers and Emmy winning EdiPrompt cueing system. We connect down the line via ISDN or Source Connect.

## **Radio Interviews & Broadcast PR**

Links with any radio or TV studio can be made via ISDN, Source Connect, Phone Patch (TBU) and Skype. Perfect for high quality interviews with experts on pressing news topics, or for conducting multiple radio interviews in one day from one location. We record all interviews for broadcast syndication purposes.

## **Choice of Studios, Mics & ISDN Units**

We have premium voice microphones available including the highly esteemed Manley Reference, Neumann U47 FET, U87 and Brauner. Our CDQ Prima 110 & Telos Zephyr 9202 ISDN units provide outstanding compatibility with studios across the world. We can also patch Skype, Source Now, ipDTL, Google Hangouts and or land line phone calls into the session, enabling more people to listen in and communicate.

## **Session Prep**

We conduct a free comprehensive ISDN or Source Connect line test with the pairing studio or broadcaster for your piece of mind before the session.

## **Delivery**

For optimal quality, we record locally and send clients uncompressed broadcast WAV files afterwards via secure FTP transfer. Our uncompressed audio files will then replace what you heard whilst recording down the line.

# ADR

We have two high-end ADR sound stages located in Manchester just minutes from the city centre.

We're a preferred supplier for Warner Brother Pictures, Sony Pictures, HBO, Lionsgate, 20th Century Fox & the BBC.

## Dial In Options

- ISDN
- Source Connect Pro & Source Now
- Landline Phone Patch (TBU)
- Skype
- Google Hangouts

We use Emmy award winning EdiPromt & EdiCue software which provides audio beeps, on screen text prompts & swipes/streamers along with recording & playback statuses to cue talent.

Our ADR sound stages have extremely low noise floors with a balanced broadband 'dead' acoustic nature & large immersive screens for picture. 1080p HD screens, along with a 1080p HD projector with a 174" screen.

## Studio Specifications

- AVID Pro Tools HDX Systems
- High-End Mac Pro Systems
- Resilient backup power on all critical equipment
- 1080p HD screens,
- 1080p HD projector with a 174" screen.

## Mic Selection

- Sanken COS11 D
- Sony ECM clip
- Senheiser MKH 416, 50, 60, 816, 806
- Other mics available on request

We deliver ADR promptly after the session via FTP or other file upload systems such as Aspera. We are also a MediaSeal approved studio allowing playback of encrypted picture files when necessary.

International ISDN call fees & Source Connect dial ins are charged additionally. The price includes the studio, an experienced ADR mixer, Pro Tools engineer and runner for client care.
